

DoEpar 1.5 – parameterization of the input text files

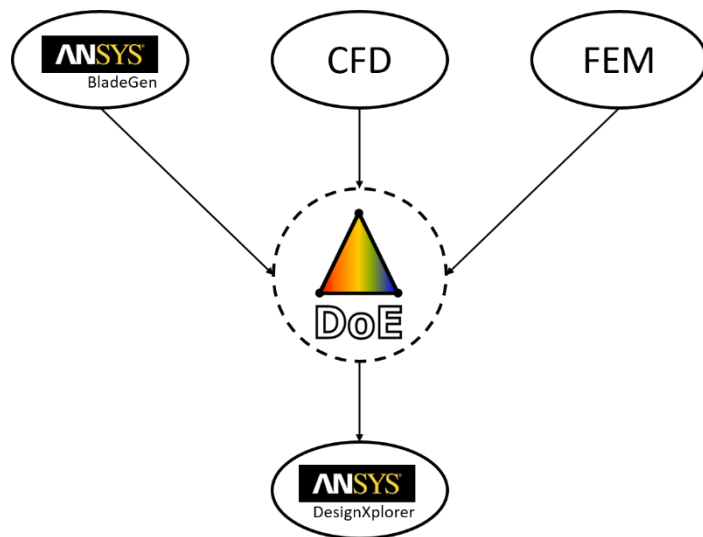

MAIN FEATURES:

- Parameterization of the text files used for DoE analysis
- Program can be paired with ANSYS DesignXplorer
- Suitable for the preparation of a complex CFD and FEM analysis
- Simple and interactive control

DESCRIPTION:

Simple and fast parameterization tool of the input file that serves as a template for creation of DoE runs. Interactive control ensures comfortable and efficient work. Do you also want to increase the efficiency of your analysis and not waste time working manually? DoEpar is here for you.
